

SINCE 1941

VANKOOLEN.COM

OUR BELIEF

The group of consumers who prefer a day without or less meat and more vegetables increases. Our answer to this trend is a nice product range, based on mushrooms, fava beans and vegetables.

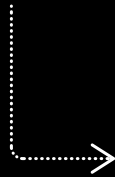

*Consumers are increasingly busy and want to know where their food is coming from. Nowadays, they want healthy food and they want to be surprised. Our products are **different** from others, but suitable for everyone!*

Sustainability

*We have a unique combination of a mushroom company and an agricultural farm.
The soil of the mushrooms is re-used to fertilize the soil to grow potatoes, wheat and various vegetables.*

A great way to contribute to a sustainable food chain! Oyster mushrooms cultivation is done on coffee thick.
